

Setting up your Apex Amplifier

Remove the ziptie or capstone from the peak of your Stargate Pyramid. Measure 11 inches from the top of each pole & place a horizontal mark. Slide a rubber O-Ring onto the end of the pole and allow it to slide down to the 11 inch mark. This will help secure the Apex Amplifier and keep it straight. Hold the amplifier & place one pole in each associated corner hole, once all 4 poles are through the associated holes slide the Apex Amplifier down until it reaches the O-Rings.

Reconnect the peak of your Stargate meditation pyramid with a new ziptie or with your capstone for enhanced power. The Apex Amplifier will stabilize your Stargate pyramid as well.

The Apex Amplifier was designed to add extra energy to your sacred geometry meditation pyramid made by Stargate Pyramids.

During testing, we discovered that the area right below the apex of the pyramid gives an extra burst of power!
